CCC-Exempt Declaration

As we know, CCC certification is mandatory in China for defined products, and CNCA is the responsible committee for the definition of CCC application range. So please visit the website below for the latest bulletin (No. 45 of year 2014) of CNCA for CCC:

Axioccontrol range (AXC)

Description of product, product group or product family

Product list:

See list on next page(s).

Description of product function:

The controllers in the Axioccontrol range (AXC) are programmable logic controllers. They are the ideal solution when it comes to high demands for performance and robustness. Together with the Axioline F I/O system from Phoenix Contact, Axioccontrol controllers offer maximum speed thanks to direct bus connection. Almost all of them are also available with an extended temperature range for extreme temperatures.

Reason why CCC certification is not required:

The programmable logic controller (可编程序控制器PLC) is not covered in CCC categories based on CNCA-Announcement No. 45 of year 2014.

So CCC Certification is not required for this product family.

Date of creation: August 2, 2018
