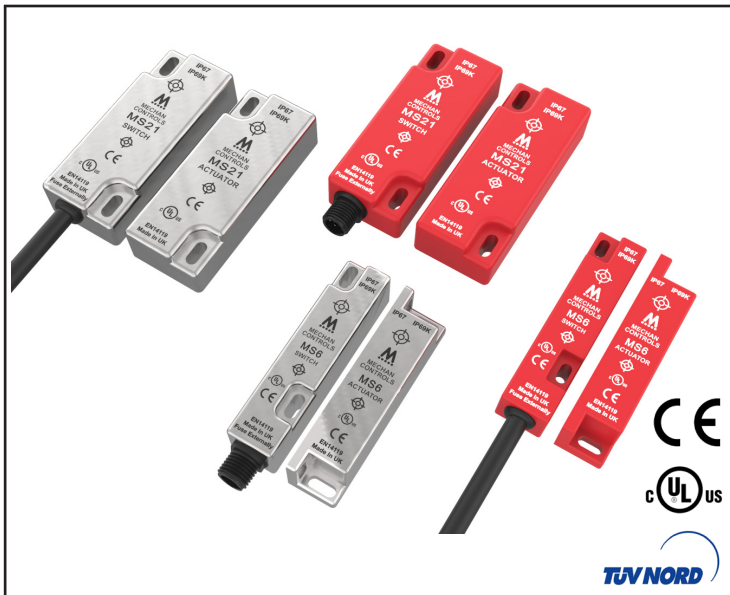
Installation Instructions for Magnasafe - MS6, MS6-SS, MS21 & MS21-SS



Description

MAGNASAFE MS6 and MS21 safety switches are non-contact, magnetically operated switch and actuator suitable for use in machine guarding applications. The non-contact operation has a 10 mm switching distance helping to ensure a long and trouble free operating life.

These safety switches are available in a robust ABS, or 316 Grade Stainless Steel housing and both switch and actuator are fully sealed to IP67/IP69K making them suitable for use in wet or dusty environments. They are easy to install and tolerant to misalignment. With correct installation, these safety switches comply with the guidelines given in EN14119.

Magnasafe safety switches are designed to be used in part of safety related control system. A risk assessment should take place to establish that the specifications of these safety switches are suitable for the application required. See Technical Specifications below or contact Mechan Controls for further information.

KEEP THIS GUIDE FOR FUTURE REFERENCE

The information is designed to help suitably qualified personnel install and operate Mechan Controls safety equipment. Before using this product, read this guide thoroughly along with any relevant European and/or National Standards E.g. Machinery Directive 2006/42/EC and its Amendments, Provision and Use of Work Equipment Regulations. Further information can be obtained from Mechan Controls Ltd.

Mounting

Do not use safety switches as a stop. 1 mm separation when closed provides the best results.

Mount the switch on to the machine frame and the actuator on to the opening edge of the door.

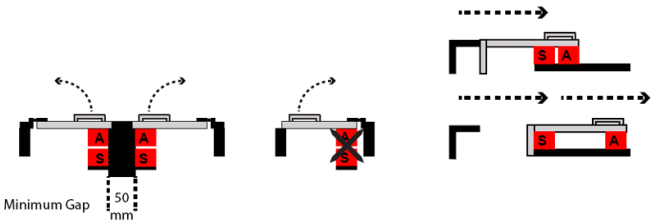
Always try to mount the switch on non-ferrous material. (Ferrous materials may reduce the switching distance.)

EN14119: Hide the actuator where possible.

NOTES:

Minimum separation 50mm between adjacent switches

DO NOT mount on hinged side of the guard.



NOTE: MS21-SS-SP-ACT
If mounting switch and actuator on ferrous metal using the MS21-SS-SP-ACT actuator may improve the switching performance (Actuator has red encapsulation)

Contact Operation	The N/O contacts on the Mechan switches are open when the actuator is away from the switch. When the actuator is within the specified operating distance the N/O contact will close and the N/C contact will open.
Fuses	All safety contacts should be fused externally AC CONTACTS = 1.6 Amps Quick Blow Fuse (MS6-10-110AC = 3 Amps Quick Blow Fuse) DC CONTACTS = 0.8 AMPS Quick Blow Fuse

Operation

The N/O contacts on the MS6 and MS21 switches are open when the actuator is away from the switch.

When the actuator is within the specified operating distance, the N/O contact will close and the N/C contact will open.

The MS6 & MS21 safety switches and actuators are designed to approach each other from most angles. When the guard is closed the targets on the printed face of the switch and actuator must be aligned.

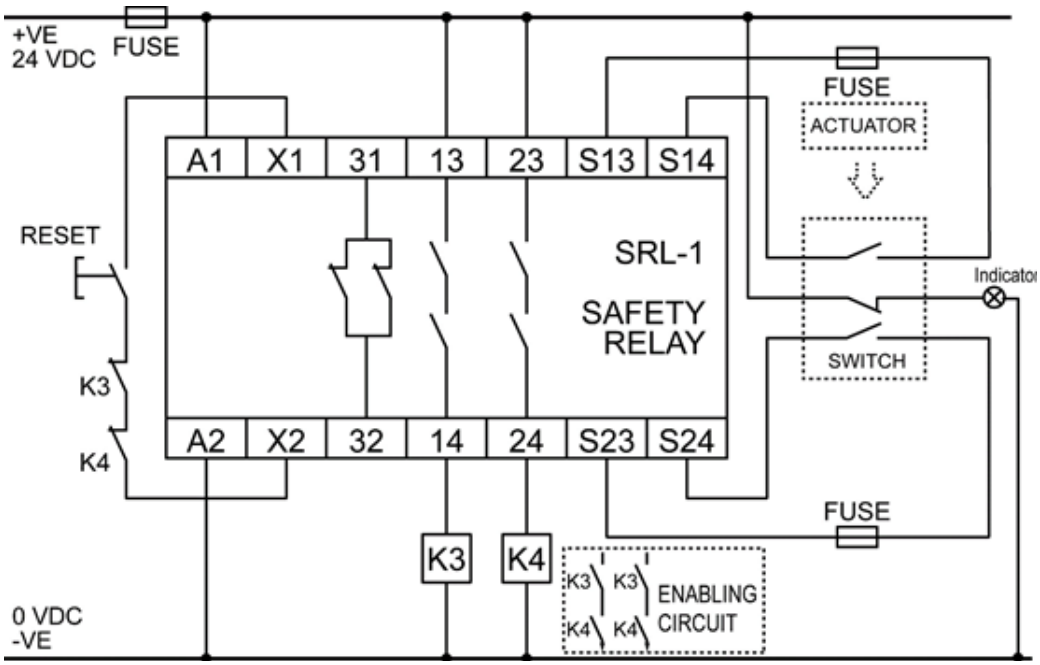
Recommend Safety Control Unit



IMPORTANT

All control contacts should be externally fused.

Recommended Safety Control Unit Mechan Part Number: SRL-1 24VAC/DC or EM1 & ESM

Maintenance

It is recommended to check the safe operation of the switches and look for signs of damage or excessive wear on a weekly basis. Damaged units should be replaced or returned to the manufacturer for repair where practical.

SCATTERGOOD & JOHNSON LTD
ELECTRICAL ENGINEERING & FLUID CONTROL DISTRIBUTORS
Est.1899

At Scattergood & Johnson Ltd, we pride ourselves on being a technical distributor to specialist industries.

Working with a range of quality product suppliers across a number of specialist markets, we are not your average 'box shifter' - we are your technical and supply chain partner.

We fully support every product we sell - for free! Our internal team and external sales engineers can answer any product or application question, no matter the complexity.

Backing up this technical ability is a range of 50,000+ products available from stock for nationwide next day delivery (same day if required!), or you can collect what you need from any of our trade counters around the UK.
