

SIDER

Load break switches for power distribution
from 125 to 3150 A with visible breaking

Load break
switches

SIDER ND 4 x 500 A
External right side operation

SIDER 3 x 1250 A
external front operation

SIDER 2500 A
direct front operation handle

The solution for

- > Main switchboard
- > Distribution panels
- > Safety enclosures for emergency load break
- > Normal atmosphere
- > Explosive atmosphere

Strong points

- > Safety thanks to visible breaking
- > Modularity

Conformity to standards

- > IEC 60947-3
- > EN 60947-3
- > VDE 0660-107 (1992)
- > NBN EN 60947-3
- > BS EN 60947-3

Approvals and certifications

- > GOST (Russie)

Function

SIDER units are manually operated 3 or 4-pole load break switches. They make and break under load conditions and provide safe isolation for any low voltage circuit.

Advantages

Safety thanks to visible breaking

Visible breaking and positive break indication ensure safe switching. The user can assess the condition of the device either during a preventive check or before an operation. SIDER load break switches are most suitable for use in safety enclosures in explosive atmospheres (zones 21 and 22). The addition of a mechanical flag indicator, directly connected to the device's breaking system, provides reliable position information on the front of the enclosure.

Functional diagram

For further details see the installation instructions supplied with the product.

(1) IP: protection degree according to IEC 60529.

Shaft guide for external operation

Use

To guide the shaft extension into the external handle. This accessory enables the handle to engage the extension shaft with a misalignment of up to 15 mm.

Required for a shaft length over 320 mm.

Description	Reference
Shaft guide	1429 0000

Auxiliary contacts for pre-break and signalling - Front operation

Use

Pre-break and signalling of positions 0 and I:

- 1 to 2 NO/NC auxiliary contacts,
- 1 to 4 NO or NC auxiliary contacts,
- 1 to 4 NO+NC auxiliary contacts.

Connection to the control circuit

6.35 mm fast-on terminal.

Characteristics

NO/NC A/C: IP2X.

Electrical characteristics

30 000 operations.

Weight of a 4 pole device (kg)		2.3	2.3	4.5	4.5	6.1	6.1

(1) Category with index A = frequent operation - Category with index B = infrequent operation.

(2) With terminal shrouds or phase barrier.

(3) 3-pole device with 2 poles in series for the "+" and 1 pole for the "-".

(4) 4-pole device with 2 poles in series per polarity.

(5) The power value is given for information only, the current values vary from one manufacturer to another.

(6) For a rated operational voltage $U_e = 415$ VAC.

Characteristics according to IEC 60947-3
