solenoid air operated

ISO 5599/1 spool valve size 2
solenoid air operated

ISO 5599/1 spool valve size 3
solenoid air operated

MULTIFUNCTION

Multifunction valves are equipped with 2 pilot selector seals on the top face on both the pilot and the return sides. Each selector seal can be set on 2 positions, allowing internal or external supply to the pilot or return operators in both the air and solenoid air operated versions. External supply allows the valves to operate with a supply pressure ranging from 0 to 12 bar and under vacuum pressure. Each seal includes a tag with an arrow to be set into the notch corresponding to the required pilot function (see below). Modifications of the function are very simple. The valves are delivered pre-set according to the valve code selected on your order.

**Air operated
spool valve**

**Solenoid air operated
spool valve**

The table below shows the accessories (delivered with the valves) and/or the solenoid valves appropriate for each function. These components can be supplied separately to change the function of the valve.

USE WITH NON-LUBRICATED AIR

The ISO-compliant valves will operate satisfactorily with lubricated, non-lubricated or dry air due to their patented, T-shaped oscillating sealing element backed with a cushioning seal.

This sealing assembly maintains a minimum pilot pressure which remains constant even if the valve is switched off for a longer period of time. On restart, the valve's performance will be the same as under continuous operating conditions.

This characteristic ensures safer operation both on valve start-up and during operation.

**MANUAL TESTERS INDICATING THE POSITION OF THE SPOOL (OPTION)**

On request, the spool valves can be delivered with manual testers to check the position of the spool or move it by manual override.

**EASY INSTALLATION**

ASCO/JOUCOMATIC offers a complementary range of components which simplify the installation of the ISO-compliant valves:

- Single subbases with side or bottom ports (1) - see pages 7 and 9
- Joinable subbases with bottom ports - see pages 8 and 9

Various accessories complete the range - see page 14

SET OF TRANSFER AND CONNECTION PLATES

• Set of transfer and connection plates to join ISO - VDMA joinable subbases of different sizes:

ISO 1 - ISO 2 set including:

- One transfer module to join ISO-VDMA joinable subbases with ISO 1 and ISO 2 **bottom** ports and connect the supply pressure (1) and exhaust (3-5) ports.
- One ISO 1 end plate (ports 1 - 3 - 5)
- One ISO 2 end plate (ports 1 - 3 - 5)

ISO 1 - ISO 3 set including the parts listed above appropriate for ISO 1 - ISO 3 transfer

ISO 1 - ISO 2 - ISO 3 set including:

- One transfer module to join ISO 1 and ISO 2 subbases
- One transfer module to join ISO 2 and ISO 3 subbases
- One ISO 1 end plate (ports 1 - 3 - 5)
- One ISO 3 end plate (ports 1 - 3 - 5)

METAL JOINABLE SUBBASES

with side ports G 1/4

JOUCOMATIC

5/2-5/3

Series

355

Type

ISO sizes 1 and 2

GENERAL

This connection unit which consists of joinable subbases and accessories has the following 3 principal characteristics:

- Equipment with a **standard** interface for series 541 spool valves complying with international standard ISO 5599/1, size 1.
- Joinable subbases with **side ports**.
- Subbases fitted with selector plates for **integrated piping** of flow paths.

CONNECTION POSSIBILITIES

The joinable subbases with side ports offer many advantages:

- Various piping possibilities due to a large number of port connections.
- Simple panel assembly due to improved accessibility to connections.
- Easy maintenance.
- Reduced costs due to the removal of pivoting mounting chassis and a reduction in the number of fittings.
- Possibility of mounting directly onto the body of machines.
- Reduction in tubing lengths giving improved flow rates and response times.

These subbases allow the connection of outlet ports (2-4) and pilot ports (12 and 14) on both side faces as shown below.

The end plates allow the connection of the main pressure supply (1), the common exhausts (3 and 5) and the pilot ports (12 and 14) on face T1 or T2 or on faces T1 and T2.

PIPING THROUGH THE END PLATES

SAMPLE PIPING ARRANGEMENTS

This arrangement allows the use of rotatable fittings

POSSIBLE FLOW PATHS

The subbases have 5 flow paths (1-3-5-12-14) all of which can be connected through the end plates of each manifold assembly..

All leaflets are available on: www.asconumatics.eu

X019-355-10

JOUCOMATIC**POSSIBLE FLOW PATHS****PIPING OF PRESSURE SUPPLY AND EXHAUSTS THROUGH THE END PLATES**

STANDARD ASSEMBLY
Pressure supply and exhausts on the same side on one end plate.

Assembly with 2 different pressure supplies and common exhausts on both end plates.

Assembly with 1 pressure supply on 1 end plate and exhausts on both end plates.

Assembly with 1 pressure supply on 1 end plate and exhausts on the other end plate.

The selector plates supplied as standard with the subbases and end plates allow the assembly as shown above.

This assembly requires a selector plate with flow connected to ports 3 and 5.

This assembly requires a selector plate with flow connected to port 1. The exhausts are blocked, while the common pressure supply is maintained. The supply port on the second end plate must be plugged.

This assembly requires a selector plate with flow connected to port 1 to be mounted on one end plate + a selector plate with flow connected to ports 3 and 5 to be mounted on the other end plate. No ports need to be plugged.

SET OF TRANSFER AND CONNECTION PLATES

• **Set of transfer and connection plates to join ISO 1 and ISO 2 metal joinable subbases with side ports:**

Set including:

- One transfer module to join ISO 1 and ISO 2 subbases
- One ISO 2 end plate (ports 1 - 3 - 5 : G 3/4)
- One ISO 1 end plate (ports 1 - 3 - 5 : G 3/8)

SCATTERGOOD & JOHNSON LTD

ELECTRICAL ENGINEERING & FLUID CONTROL DISTRIBUTORS

At Scattergood & Johnson Ltd, we pride ourselves on being a technical distributor to specialist industries.

Working with a range of quality product suppliers across a number of specialist markets, we are not your average 'box shifter' - we are your technical and supply chain partner.

We fully support every product we sell - for free! Our internal team and external sales engineers can answer any product or application question, no matter the complexity.

Backing up this technical ability is a range of 50,000+ products available from stock for nationwide next day delivery (same day if required!), or you can collect what you need from any of our trade counters around the UK.

Select your specialist interest below to learn more about how we can help.

Online, In Branch and On the Road - Scattergood & Johnson Ltd, there when you need us.
