## Highlights

The X5 Wireless Handheld HMI is a compact and lightweight device with an ergonomic design. Wireless connection with certification for safety devices makes this product the ideal solution for industrial applications.

Integrated devices (keyboard, potentiometers, handwheel) can be fully programmed assuring a quick use with your automation project. X5 is fully programmable with JMobile.

Working in combination with the Xbase (Base Station) as a peer-to-peer SIL3 rated WI-Fi connection, the flexibility of the X5 can be realised.

Where there exists the need to easily connect and command movement by distance. Where a full day's battery life is useful. Where the fatigue of the operator is important to reduce so that human errors do not occur....the X5 system provides the most ground-breaking solution.
