

# Digital Modules ASi, IP67, M12

2 x 2 connectors for profile cable

2 color LEDs per output, state (yellow), overload (red) (optional)

(Figure similar)

Replacement, ASi Version 2: single slaves (digital) are also working with the first generation ASi masters.

(1) **M12 wiring:** either as a single-wiring, Y-wiring or mixed-wiring.

**Single-wiring**

**Y-wiring**

**Mixed-wiring**

(2) **Input voltage (sensor supply):** inputs are supplied by ASi or by AUX (auxiliary 24 V power). If supplied by ASi, inputs shall not be connected to earth or to external potential.

(3) **Output voltage (actuator supply):** outputs are supplied by ASi or by AUX (auxiliary 24 V power). If supplied by ASi, outputs shall not be connected to earth or to external potential

(4) **ASi connection:** the connection to ASi as well to AUX (auxiliary 24 V power) is made via yellow resp. black ASi profile cable with piercing technology or via M12 socket (in IP20 via clamps).

(5) **ASi address:** 1 AB Slave (max. 62 AB Slaves/ASi network), 2 AB Slaves (max. 31 modules with 2 AB Slaves), Single Slaves (max. 31 Single Slaves/ASi network), mixed use allowed.

For modules with two slaves the second slave is turned off as long as the first slave is addressed to address "0". Upon request, slaves are available with specific ASi Slave profiles.

**(1) Line protection:**

If the module is supplied via a M12 connection with A or B coding, it may only be used with a current load of max. 4 A per pin in acc. with IEC 61076-2-101 and IEC 61076-2-109. A fused tap is recommended. There is no such limitation for modules supplied via piercing contacts.

**Connection to ASi and AUX via M12**

**via piercing contacts**

(2) Loop resistance ≤150 Ω

**(3) BWU2552, BWU2620, BWU3077, BWU3457, BWU3556 Derating power supply of attached sensors**

(4) See table "Peripheral fault indication"

(5) The module is suitable for use in passively safe paths as it has no connection to an AUX potential.

# Digital Modules ASi, IP67, M12

- (6) Maximum ambient operating temperature +55 °C according UL certificate for the use in the USA and Canada
- (7) Protection category IP67 can only be achieved if all open connections are sealed with suitable end caps fulfilling the same protection category.
- (8) Depending on substructure module (see accessories). The substructure module is not included in the scope of delivery.
- (9) BWU2725 from Ident. No. 18225; the module is suitable for use in passively safe paths because an exclusion of errors can be assumed for the connection of the two potentials, ASi and AUX.

(1) Loop resistance ≤150 Ω

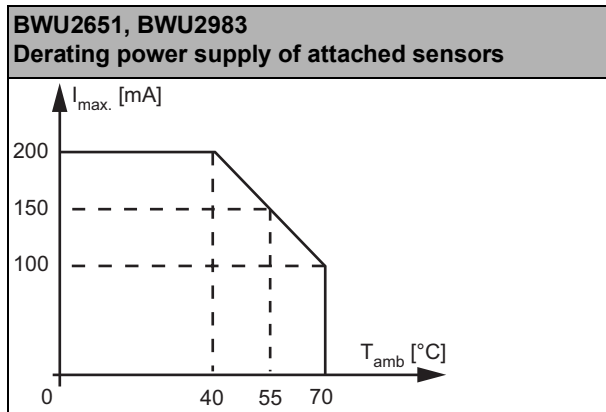

(2) **See table "Peripheral fault indication"**

(3) **BWU2767:** LEDs I3/O3 and I4/O4 are indicating only the state of inputs I3 and I4 in accordance with the factual input/output assignment.

(4) BWU2767 from ID no. 18851; The module is suitable for use in passively safe paths because an exclusion of errors can be assumed for the connection of the two potentials, ASi and AUX.

(5) Temperature range up to -30°C from Ident.No. ≥16388 (BWU2767).

(6) Maximum ambient operating temperature +55 °C according UL certificate for the use in the USA and Canada

(7) Depending on substructure module (see accessories). The substructure module is not included in the scope of delivery.

(8) Protection category IP67 can only be achieved if all open connections are sealed with suitable end caps fulfilling the same protection category.

(9)

(10) BWU2547 from Ident. No. 18173; the module is suitable for use in passively safe paths because an exclusion of errors can be assumed for the connection of the two potentials, ASi and AUX.

(11) BWU3887 from Ident. No. 18303; the module is suitable for use in passively safe paths because an exclusion of errors can be assumed for the connection of the two potentials, ASi and AUX.

# Digital Modules ASi, IP67, M12

(13) The module is suitable for use in passively safe paths as it has no connection to an AUX potential.

(1) Loop resistance ≤150 Ω

(2)

(3) See table "Peripheral fault indication"

(4) BWU2487 from Ident. No. 18369; BWU3032 from Ident. No. 18285; BWU3375 from Ident. No. 18403; the module is suitable for use in passively safe paths because an exclusion of errors can be assumed for the connection of the two potentials, ASi and AUX.

# Digital Modules ASi, IP67, M12

- (5) Temperature range up to -30°C from Ident.No. ≥16381 (BWU3032).
- (6) Maximum ambient operating temperature +55 °C according UL certificate for the use in the USA and Canada
- (7) Depending on substructure module (see accessories). The substructure module is not included in the scope of delivery.
- (8) Protection category IP67 can only be achieved if all open connections are sealed with suitable end caps fulfilling the same protection category.
- (9) **Line protection:**  
If the module is supplied via a M12 connection with A or B coding, it may only be used with a current load of max. 4 A per pin in acc. with IEC 61076-2-101 and IEC 61076-2-109. A fused tap is recommended. There is no such limitation for modules supplied via piercing contacts.

### Connection to ASi and AUX via M12

### via piercing contacts

- (12) The module is not suitable for use in passively safe paths because an exclusion of errors cannot be assumed for the connection of the two potentials, ASi and AUX.

**BWU2617, BWU2626, BWU3426, BWU2684, BWU3496, BWU3540**  
**Derating of power supply of attached sensors**

(3)

**BWU3426, BWU3496, BWU3540**  
**Derating output current per output**

(4) See table "Peripheral fault indication"

(5) BWU3496 from Ident. No. 16960; BWU3540 from Ident. No. 17247; BWU3426 from Ident. No. 17830; BWU2617 from Ident. No. 16955; BWU2684 from Ident. No. 17245; the module is suitable for use in passively safe paths because an exclusion of errors can be assumed for the connection of the two potentials, ASi and AUX.

(6) Maximum ambient operating temperature +55 °C according UL certificate for the use in the USA and Canada

(7) Protection category IP67 can only be achieved if all open connections are sealed with suitable end caps fulfilling the same protection category.

(1) Loop resistance ≤150 Ω

(2)

(3) See table "Peripheral fault indication"

(4) BWU3510 from Ident. No. 18000; BWU2810 from Ident. No. 17248; BWU2645 from Ident. No. 17249; the module is suitable for use in passively safe paths because an exclusion of errors can be assumed for the connection of the two potentials, ASi and AUX.

(5) Maximum ambient operating temperature +55 °C according UL certificate for the use in the USA and Canada

(6) Protection category IP67 can only be achieved if all open connections are sealed with suitable end caps fulfilling the same protection category.

# Digital Modules ASi, IP67, M12

**(7) Line protection:**

If the module is supplied via a M12 connection with A or B coding, it may only be used with a current load of max. 4 A per pin in acc. with IEC 61076-2-101 and IEC 61076-2-109. A fused tap is recommended. There is no such limitation for modules supplied via piercing contacts.

**Connection to ASi and AUX via M12**

**via piercing contacts**

(1) Loop resistance ≤150 Ω

(2)

(3) See table "Peripheral fault indication"

(4) BWU2713 from ID no. 18595; The module is suitable for use in passively safe paths because an exclusion of errors can be assumed for the connection of the two potentials, ASi and AUX.

(5) Maximum ambient operating temperature +55 °C according UL certificate for the use in the USA and Canada.

(6) Depending on substructure module (see accessories). The substructure module is not included in the scope of delivery.

(7) Protection category IP67 can only be achieved if all open connections are sealed with suitable end caps fulfilling the same protection category.

(8) The module is not suitable for use in passively safe paths because an exclusion of errors cannot be assumed for the connection of the two potentials, ASi and AUX.

# Digital Modules ASi, IP67, M12

- (10) To power consumers whose current draw is greater than 2A, two or more outputs can be combined with each other. The data bits of the bundled outputs must be set at the same time.
- (11) BWU2728 from Ident. No. 17399; the module is suitable for use in passively safe paths because an exclusion of errors can be assumed for the connection of the two potentials, ASi and AUX.

|                     |   |
|---------------------|---|
| External protection | An isolated source with a secondary open circuit voltage of $\leq 30 V_{DC}$ with a 3 A maximum over current protection. Over current protection is not required when a Class 2 source is employed. |
| In general          | UL mark does not provide UL certification for any functional safety rating or aspects of the above devices.   |

# Digital Modules ASi, IP67, M12

## Pin assignment

| Signal name               | Explanation   |
|---------------------------|---|
| Ix                        | digital input x   |
| Ox                        | digital output x  |
| 24V <sub>ext out</sub>    | power supply, out of external voltage, positive pole (AUX, actuator supply) |
| 0V <sub>ext out</sub>     | power supply, out of external voltage, negative pole (AUX, actuator supply) |
| 24V <sub>out of ASi</sub> | power supply, out of ASi, positive pole (sensor supply)                     |
| 0V <sub>out of ASi</sub>  | power supply, out of ASi, negative pole (sensor supply)                     |
| ASi +, ASi -              | connection to ASi bus   |
| n.c. (not connected)      | not connected   |

| Connections        |                   |                                      |                            |      |                           |      |      |

## Mounting according to cable direction

ordinary

turned

## Line termination with sealing profiles / as junction

## Accessories:

- ASi substructure module for 4 channel module in 45 mm housing (art. no. BWU2349)
- ASi substructure module (CNOMO) for 4 channel module in 45 mm housing (art. no. BWU2350)
- ASi substructure module (CNOMO) for 8 channel module in 60 mm housing (art. no. BWU2351)
- Protection caps for unused M12 sockets (art. no. BW2368)
- Sealing profile IP67 (IDC plug), 60 mm (art. no. BW3282)
- Sealing profile IP67 (IDC plug), 45 mm (art. no. BW3283)
- Passive Distributor ASi/AUX to 2 x M12 socket, internal protection via changeable 4 A slow-blow fuses (art. no. BWU3087)
- It is recommended to use pre-assembled cables to connect the power source with the module.

# SCATTERGOOD & JOHNSON LTD

ELECTRICAL ENGINEERING & FLUID CONTROL DISTRIBUTORS

Est.1899

At Scattergood & Johnson Ltd, we pride ourselves on being a technical distributor to specialist industries.

Working with a range of quality product suppliers across a number of specialist markets, we are not your average 'box shifter' - we are your technical and supply chain partner.

We fully support every product we sell - for free! Our internal team and external sales engineers can answer any product or application question, no matter the complexity.

Backing up this technical ability is a range of 50,000+ products available from stock for nationwide next day delivery (same day if required!), or you can collect what you need from any of our trade counters around the UK.

Select your specialist interest below to learn more about how we can help.

Online, In Branch and On the Road - Scattergood & Johnson Ltd, there when you need us.
