Part Numbers

110 Volt Version : OPT-LOGIP-11
230 Volt Version : OPT-LOGIP-23

Important Safety Information

Indicates a potentially hazardous situation which, if not avoided, could result in injury or death.

Indicates a potentially hazardous situation which, if not avoided, could result in damage to property.

All Optidrive products and options are intended for professional incorporation into complete equipment or systems. If installed incorrectly they may present a safety hazard. Optidrives and Options may use high voltages and currents, may carry high levels of stored electrical energy, and may be used to control mechanical plant that could cause injury. Close attention should be paid to system design and electrical installation to avoid hazards in either normal operation or in the event of equipment malfunction. System design, installation, commissioning and maintenance must be carried out only by personnel who have the necessary training and experience. They must carefully read this safety information and the instructions in this Guide and follow all information regarding transport, storage, installation and use of the Optidrive, including the specified environmental limitations.

Optidrives and Options should be installed only by qualified electrical persons and in accordance with local and national regulations and codes of practice. The Optidrive has an Ingress Protection rating of IP20. For higher IP ratings, use a suitable enclosure.

Electric shock hazard! Disconnect and ISOLATE the Optidrive before attempting any work on it. High voltages are present at the terminals and within the drive for up to 10 minutes after disconnection of the electrical supply.

Where supply to the drive is through a plug and socket connector, do not disconnect until 10 minutes have elapsed after turning off the supply

Specification

Input Voltage (AC)	OPT-LOGIP-11 : 100 – 120 + / - 10%
Ambient Temperature	OPT-LOGIP-23 : 200 – 240 + / - 10%
Approvals	Operating : 0 to 50C
	Storage : -40 to + 60C
	IP00, UL94V-0

Description

This Option Module is designed for use with the Optidrive Plus 3GV range of drives, to allow the digital inputs of the drive to be controlled directly from a 110 Volt or 230 Volt control supply without the need for interfacing relays.

There are two versions of the module, a 110 Volt version for voltages ranging from 100 – 120 VAC, and a 230 volt version for voltages ranging from 200 – 240VAC.

The existing analog input on the Optidrive Plus 3GV can still be used, by connecting the analog signal input on terminal 6, or alternatively a fourth 110 / 230VAC digital input can be connected via the removable plug.

All other inputs and outputs to the drive are not affected.

Installation

Install the Option onto the Optidrive by inserting the row of 11 pins into the terminal connector of the Optidrive, ensuring that the terminals are tightened.

If the Option is being used with Frame Size 1 Optidrive, care should be taken to support the Option when the terminal screws of the Option are being tightened or loosened.

82-LOGHV-IN_V1.02

**SCATTERGOOD
& JOHNSON LTD**
ELECTRICAL ENGINEERING & FLUID CONTROL DISTRIBUTORS

Est.1899

At Scattergood & Johnson Ltd, we pride ourselves on being a technical distributor to specialist industries.

Working with a range of quality product manufacturers across a number of specialist markets, we are not your average 'box shifter' - we are your technical and supply chain partner.

We fully support every product we sell - for free! Our internal team and external sales engineers can answer any product or application question, no matter the complexity.

Backing up this technical ability is a range of 50,000+ products available from stock for nationwide next day delivery (same day if required!), or you can collect what you need from any of our trade counters around the UK.

Select your specialist interest below to learn more about how we can help.

Online, In Branch and On the Road - Scattergood & Johnson Ltd, there when you need us.
