| Technical Data                      |                                 |
|-------------------------------------|---------------------------------|
| Piston Diameter [mm]                | 50                              |
| Stroke length [mm]                  | 1250                            |
| Piston position [mm]                | 0                               |
| Piston Mounting                     | 0 = Standard                    |
| Air connection                      | 0 = Standard                    |
| Seals                               | 0 = Standard (NBR)              |
| Screws                              | 0 = Standard (galvanized steel) |
| Grease Lubrication                  | 0 = Standard                    |
| End cap position                    | 0 - l+r 0° = in front           |
| Daempfung [mm]                      | 0-Standard                      |
| ATEX version                        | Standard                        |
| Mounting Guides [mm]                | without                         |
| Mounting Powerslide [mm]            | without                         |
| zusätzlicher Führungsschlitten [mm] | 0 - ohne                        |
| Cover / cable channel               | 0 - Standard                    |
| Mounting Profile [mm]               | without                         |
| Mounting Magnetic switch [mm]       | without                         |
| Mounting carrier [mm]               | without                         |
| Mounting Shock absorber [mm]        | without                         |
| Mounting End Cap Mounting [mm]      | without                         |
